

# Partnering with Imagination Station

## Our History

For over 20 years, Imagination Station has been responsible for igniting the imaginations of children in the Greater Lafayette community through interactive experiences in Science, Technology, Engineering, and Mathematics. In 1995, the Association for Science, Space, Engineering and Technology Inc. (ASSET Inc.) opened its doors as Imagination Station. ASSET wanted to create space, science, and technology based activities and exhibits readily accessible to children and adults in the area. As we enter our third decade of service, we rely on the generosity of our donors, members, and volunteers to continue our mission of service and learning.

## Our Mission

Imagination Station provides hands-on learning experiences in the fields of science, technology, and engineering in order to strengthen the scientific literacy of children and families in the Greater Lafayette Community.

## How We Can Help

With the aid of our staff and volunteers, Imagination Station can create unique learning opportunities for your troop. Here are some examples:

- Assistance with earning merit badges (such as the Chemistry or Reptile badges)
- Hosting a science-themed boy scout retreat
- Allowing the troop to host one of our Friday Family Science Nights or Demonstration Saturdays to demonstrate their knowledge to the community

We would also be open to helping with any of your ambitions or learning goals if you believe we could aid in another capacity.

We at Imagination Station look forward to finding ways to assist your organization, and giving the children in your troop a fun and educating experience.

Emily Sifers

Imagination Station Operations Manager
